### ***Claim Rejections - 35 USC § 103***

3. The following is an examiner's statement of reasons for allowance: The prior does not anticipate nor make obvious a process for treating a semiconductor substrate in a plasma chamber, said method comprising the steps of: supporting the substrate on a bottom electrode; supplying process gas to the chamber; forming a plasma adjacent an exposed surface of an upper electrode; and processing the semiconductor substrate with the plasma; wherein the upper

Art Unit: 2813

electrode comprises a showerhead electrode having a plurality of gas outlets supplying the process gas into the chamber, the showerhead electrode having central portion and a peripheral portion surrounding the central portion, the peripheral portion including a step projecting from an exposed surface thereof and extending at least partially around the central portion, the step providing a predetermined localized density of the plasma formed adjacent the exposed surface of the shower head electrode. The prior also does not anticipate nor make obvious the showerhead itself as described above, nor an apparatus using the showerhead electrode.
